examined these particular subdivisions and their needs. We're not a very...we're not very good in the Revenue Committee of being able to assess their needs, what their program requirements are. That's the purview of the Appropriations Committee. So maybe later on you will be able to get a more balanced discussion about those topics. I would certainly like to visit the aid programs and the formulas, see if we can't rationalize those, but we weren't able to do that and bring it to you in the context of LB 142. It was about \$4 million. They said, we don't want that money, leave it where it's at, we want some different money, we want state revenue, but we want different money than from this Environmental Trust. Now we tried, we tried to give it to them, because there was enough votes, I think, to get it out of the committee, because we kind of were putting things together, but then they came in and they opposed it. Now that kind of tells me that if you...if they
